Desk accessories including wire cable basket, cable chain and magnetic cable protector.

## 18 ■ Technical Specifications

Levanta technical specifications overview and certifications.

## 20 ■ Levanta Colours

View the range of available desk top and frame colours.

# LEVANTA HEALTH BENEFITS

## HEART RISKS

Muscles are less active and therefore burn less fat while a person is seated. Together with higher blood pressure and elevated cholesterol levels, this increases the risk of heart disease. People who sit for more than 8 hours a day, double their risk of developing heart disease compared to those who sit for less than 4 hours a day.

## MOOD AND ENERGY LEVELS

Standing desks appear to have a positive influence on overall wellbeing. In one 7-week study, participants using standing desks reported less stress and fatigue than those who remained seated the entire workday. One study found that standing desks can lower feelings of stress and fatigue while improving mood and energy levels.

## BACK PROBLEMS

Staying seated for long periods can cause weight pressure to be unevenly distributed over the spine, leading to spinal problems in the lower back. Several studies show that standing desks can dramatically decrease chronic back pain caused by prolonged sitting.

## INCREASE LIFESPAN

Studies have found a strong link between increased sitting time and early death. This is not surprising given the strong association between sedentary time, type 2 diabetes and heart disease. A review of 18 studies found those who sit the most are at a 49% greater risk of dying early than those who sit the least. It's estimated that reducing sitting time to 3 hours per day can raise the average life expectancy by two years.

## BRAIN ACTIVITY

If you stay fixed in one position, insufficient oxygen rich blood will be pumped around the body, causing brain function to slow down.

## LOWERS RISK OF OBESITY

Prolonged periods of sitting can slow down your metabolism and promote fat accumulation. By simply standing up intermittently while you work, you'll instantly decrease your risk of obesity. Using active workstations such as a Levanta desk will keep you productive, while also keeping you in shape.

## POOR CIRCULATION

Remaining seated for too long may result in swollen ankles and varicose veins, caused by fluids sinking into the legs.

## MUSCLE PROBLEMS

If you stay seated all day, your leg muscles and gluteus muscles will become inactive, thus reducing your ability to sit up straight.

## Single Desking

Levanta Single is a stand alone electrically height adjustable desk. Each desk features a 3-button memory master control panel allowing the user to simply set their preferred sitting or standing height at the touch of a button. Sit or stand at your desk throughout the day to improve your health and wellbeing.

## Bench Desking

Levanta Bench is a two person sit stand height adjustable desk with the same adjustability as the Levanta Single desk. Each user is able to work at their own chosen height making it a perfect solution for an office environment. Levanta Bench desking also offers the option to add an acoustic screen between desks.

## Radial Desking

Levanta Radial desks can be used to utilise corner space in the office or in combinations to create cluster desks for either 2 or 4 workstations. Levanta Radial is a perfect solution for executive desking allowing for extra work space and room for underdesk storage solutions.

# **Electric Height Adjustable Desking**

# LEVANTA FEATURES

Our sit stand desks can be electrically adjusted to sitting or standing height to prevent problems associated with prolonged sitting. The range of office desks includes single stand-alone desks, bench desks and radial desks.

Six Axis Anti-collision software – this is software that is built into the control box that ensures that if the desk meets an obstruction, as a safety feature, it reverts to the position it came from.

Stroke: 650mm

Speed: 40 mm/s

Distributed load frame only: 125kg

Noise: <50 db

Programmable Control Panel stores up to 3 predefined heights, selected at the touch of a button.

Min 1080mm | Max 1800mm

Stroke: 720mm

Height (frame):  
Height of 595mm to 1245mm

Stroke adjustment:  
650mm
